## Positions Available for QnC Construction

### Drywall Finisher / Painter (Immediate Opening)

Looking for a self-motivated individual with experience in drywall work including hanging, taping, and finishing new drywall. They will be responsible for any repairs to walls, ceilings and smoothing any imperfections in preparation for painting.

This position should also have experience in painting interiors, exteriors, and the capabilities to cut in different colors and apply stain and finishes to wood.

### HVAC Technician (Immediate Opening)

This individual must have a good working knowledge of HVAC services. They will be responsible for installing various heating and air conditioning systems year-round. The position requires knowledge of maintaining and servicing those units as well as troubleshooting issues and performing repairs.

HVAC certification is preferred but not required as QnC Construction will provide training for certification.

### CAD Drafter

This individual must have sound knowledge of drafting practices and experience with AutoCAD and Revit. Knowledge of current building standards is a bonus. This position is responsible for the creation of 3d CAD drawings for estimating and permit acquisition. Individual will assist with floor plan layouts and home designs based on the client's ideas or examples, need to create door and window schedules, along with complete plan sets for client submission.
